

ROHITH MUSUNURI

(716)-520-6334 | rohith2369@gmail.com | Princeton, New Jersey

PROFILE

Motivated Full Stack Developer with a strong foundation in Python and a passion for building scalable web applications. Recently graduated with a degree in Computer Science, with coursework focused on web development, databases, and software engineering principles. Proficient in Python, JavaScript, HTML, CSS, and SQL, with a solid understanding of front-end and back-end technologies. During my studies, I gained hands-on experience working on various web projects, where I developed dynamic and responsive user interfaces using modern front-end frameworks such as Flask and Django. I am well-versed in designing and implementing RESTful APIs, handling data storage and retrieval, and optimizing database performance.

SKILLS & TOOLS

Front-end Technologies:

HTML5, CSS3, JavaScript, React.js, Angular, Vue.js, Bootstrap, jQuery, AJAX, Redux

Database Technologies:

PostgreSQL, MySQL, MongoDB, SQL Server, Oracle, Redis, Firebase, Cassandra

Back-end Technologies:

Java, Node.js, Python, R, Django, Laravel,

Express.js, ASP .NET, Flask, PHP , MVC Framework, SOAP , RESTful APIs, SpringBoot, Maven, Micro-services

Tools and Technologies:

Git, Visual Studio Code, Docker, Kubernetes, AWS, Heroku, Google Cloud Platform, Microsoft Azure, Apache, Nginx, Swagger, Postman

PROFESSIONALEXPERIENCE

Full Stack Developer, Sri Infotech

08/2022 - present | New Jersey, USA

- Designed and developed a range of responsive **web** pages using **HTML, Angular, Bootstrap, and JavaScript**, and utilized React framework to overhaul the user experience, resulting in a **25% increase** in user engagement.
 - Developed a high-performance web application for a financial client using **Spring Boot with Microservice architecture**, Java, and Hibernate, improving data processing **efficiency by 40%** and reducing **processing time by 20%**.
 - Utilized **MySQL and PostgreSQL** to manage and maintain SQL databases for **multiple web applications**, ensuring **high performance and scalability** of the database.
 - Configured **Maven builds** for applications and was responsible for writing **Docker** files and establishing CI/CD pipelines with the repository, resulting in faster and more efficient deployment.
-

PROJECTS

Prediction of sales and deploying a web application: Python, Streamlit, Flask, HTML

- Created an end-to-end model to predict sales of products from black Friday dataset.
 - Performed Data analysis and feature engineering to extract most significant features.
 - Applied ML models using Pyspark to develop a model with an accuracy of 94.
 - Deployed ML models in Streamlit for getting best model along with visualizations.
-

EDUCATION

Master of Science, University at Buffalo

08/2021-02/2023 | Buffalo, USA

Computer and Information Science

Bachelor of Technology, Vellore Institute of Technology

07/2016 – 06/2020 Vellore, India

Electronics and Communication Engineering
